OMKAR ABHAY INGAWALE

SOFTWARE DEVELOPER

PROFILE

Detail-oriented software engineer with a focus on front-end and full-stack development, bringing expertise in HTML, CSS, JavaScript, ReactJS, and Node.js. Strong foundation in developing dynamic and responsive user interfaces, integrating backend systems, and working with databases such as MongoDB. Passionate about learning and applying new technologies, with a keen eye for optimizing user experience and delivering high-quality projects. Excellent teamwork and communication skills with a commitment to continuous improvement.

WORK EXPERIENCE

Agile Software, Pune .

1 JANUARY 2024 - 25 JULY 2024

Frontend Developer

- Developed functionality for multi tenancy and implemented file uploading through AWS S3 buckets using React.js, incorporating polling mechanisms. Managed features such as CRUD operations with role-based access control.

Agile Software, Pune

20 July 2024 - 1 November 2024

Backend Developer

- Worked on the Stripe payment module and implemented CRUD functionalities in Node.js, utilizing Express.js and Sequelize with a PostgreSQL database. This project included the integration of AI functionality and was designed to support multi tenancy.

Agile Software, Pune

15 May 2024 - 15 January 2025

Frontend + Backend Developer

- Sync invoices and customer data from Intuit QuickBooks to a Monday.com board within a work OS system, utilizing React.js and Node.js.

Agile Software, Pune

7 November 2024 - 8 November 2024

Frontend Developer

- The Login Page allows users to authenticate via username and password, returning a secure token for access. The Data View Page offers filters for daily, weekly, and monthly data, displays results in a table view, and supports Excel export for offline use.

Agile Software, Pune

10 November 2024 - Present

Frontend Developer

- Create reusable components with test cases for those components/pages. Ensure responsiveness and use RTK Query to call REST APIs.
